

Oilseeds: World Markets and Trade

Tight Canada Rapeseed Supplies Impact Global Oilseeds Markets

Hot and dry conditions for much of the Canadian Prairies have significantly impacted rapeseed production this growing season. The 2021 production forecast is reduced more than 4 million tons this month to 16.0 million. Average yield is reduced nearly 20 percent while harvested acreage is lower in response to anticipated abandonment or increased harvesting for forage. With lower production and reduced carryin from last season, rapeseed supplies are forecast to decline more than 20 percent to the lowest level in nearly 10 years.

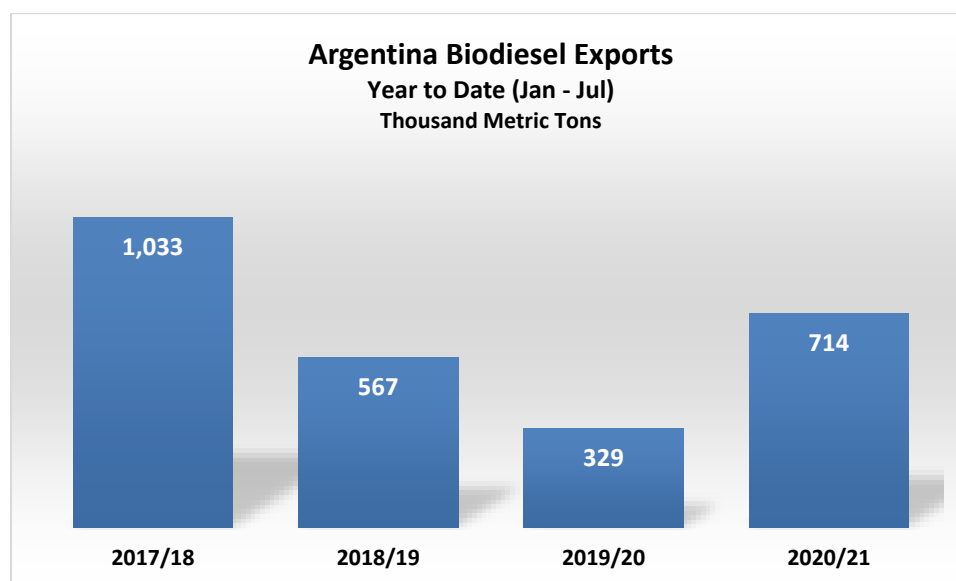

With beginning stocks already at minimal levels due to the strong demand observed over the past few years, most of the decline in availability will be reflected in the seed exports. Crush is also expected to decline; however, with continued strong demand for canola meal and oil in the United States, and positive margins for Canadian crushers, the impact on domestic crush volume is expected to be less significant. Crush volume is forecast to fall just 9 percent while exports are forecast to decline by one-third.

Outside of Canada and the United States, rapeseed supplies (production plus beginning stocks) are forecast to rise more than 2 percent, with increased exports out of Eastern Europe and Australia offsetting some of the decline out of Canada. With Canada representing more than 60 percent of global trade over the past 4 years, importers such as China and the EU will face the greatest challenges, requiring drawdowns in local stocks and increased substitution with other protein meals and oils. An expected strong rebound in sunflowerseed production in Europe will be instrumental in offsetting the reduced availability of rapeseed in Canada.

MARKET FEATURES

Argentina Reduces Biodiesel Blending Requirements in Bid to Boost Soybean Oil Exports

Argentina cut biodiesel blending requirements in half, reducing the percentage of biodiesel required for blending in the domestic market to 5 percent. This is expected to increase the quantity of soybean oil available for export by nearly 500,000 tons based on historic blend rates. However, further analysis suggests a more muted increase in availability.

Source: Argentina National Institute of Statistics & Argentina NABSA Ship Sailed Data

COVID-19 restrictions on travel in 2020 likely reduced demand for transport fuels which reduced biodiesel demand in both domestic and export markets. Furthermore, the rock-bottom petroleum prices observed in 2020 likely nibbled around the edges of biodiesel demand, adding to the availability of soybean oil for export last year. With a return to higher petroleum prices and travel restrictions easing in many markets, demand for biodiesel, particularly for export, is rising as noted in the year-to-date Argentine biodiesel trade. Biodiesel refiners are likely to be aggressive marketers in the coming year to keep plants operating near capacity.

With gains to soybean oil availability last year, a consequence of declining fuel demand, and rising biodiesel use this year as global demand for transport fuels rebounds, the year-over-year increase in soybean oil for export is likely to be a fraction of the potential gains from the cut in domestic blending requirements.

Low Water Levels in the Paraguay and Parana River Basin Complicate Soybean and Product Exports

Two years of dry weather have cut river levels in both the Paraguay and Parana Rivers. The Parana River, which runs past the main Argentine loading facilities at Rosario and San Lorenzo, has been reduced to its lowest level in over 75 years, which has in turn reduced loadings 20 percent from normal. Expectations are for water levels to decline further until rains return later in the year.

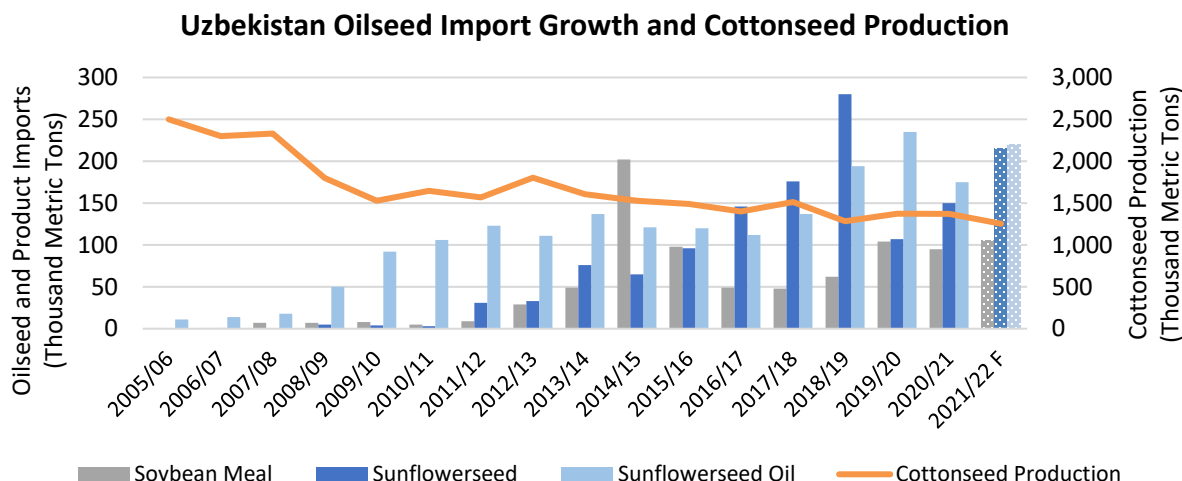

The low water level complicates and increases the cost of shipping from Rosario and San Lorenzo as additional supplies of soybeans and products must be barged further down the river where draft is deeper and ships can be fully loaded. While Argentina soybean meal exports have rebounded from last year and are near normal levels (April – July) observed in 2016, 2017, and 2019, volumes could be even higher, if the logistical hurdles and added costs were not in play as evidenced by the strong pace of Brazilian soybean meal exports.

Brazil soybean meal exports are forecast to reach record volume this year at 17.3 million tons, a situation likely augmented by the difficulties faced in Argentina. Low water levels are also an issue in Paraguay where soybean exports to Brazil are elevated. While it is generally less expensive to barge soybeans down the Parana river, added costs and logistical complications have improved the relative economics of shipping soybeans by truck and rail to processors in Brazil. With larger crush volume and strong meal exports, processors are offering attractive prices for soybeans.

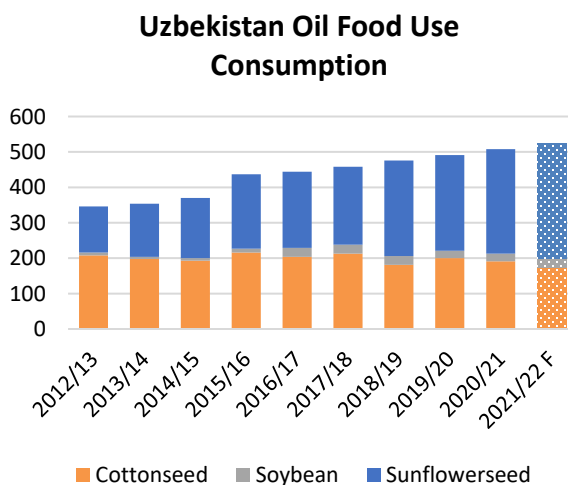

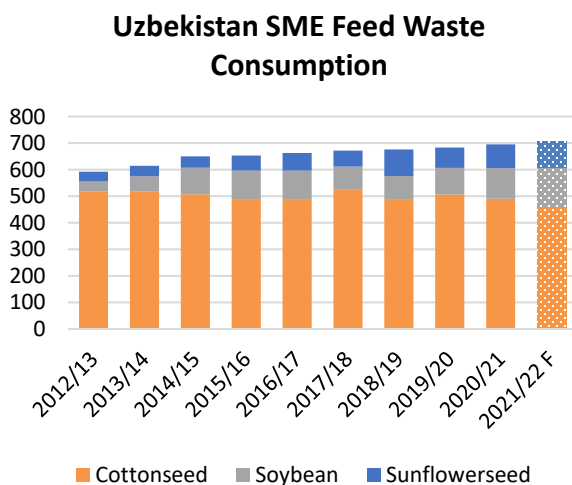

The assumed return of rains later in the year will reduce the issues for both Paraguay and Argentina, particularly if precipitation exceeds normal levels. However, with reservoir levels unusually low, some of the returning flow will be required to refill reservoirs. This will slow the return to more normal river levels so logistic and cost factors may linger into the new year and next year's harvest.

Uzbekistan Turns to Sunflowerseed and Soybeans to Meet Growing Meal and Oil Consumption

Over the past decade, Uzbekistan has transitioned from importing virtually no sunflowerseed to a top-five sunflowerseed importer. Uzbekistan imported less than 500 tons of sunflowerseed in 2007/08, compared to more than 100,000 tons during each of the past 5 years. Soybean meal and sunflowerseed oil imports have experienced similar upticks over the same period. Imports of all three have jumped in response to growing meal and oil demand coupled with falling Uzbekistan cottonseed production.

Historically, crushing domestically produced cottonseed generated sufficient meal and oil to satisfy feed demand for the poultry sector and oil consumption for food use. However, Uzbekistan no longer produces enough cottonseed to meet growing domestic demand and must supplement meal and oil needs through increased imports of other oilseed and products, such as sunflowerseed and soybeans. Ten years ago, cottonseed meal accounted for almost 90 percent of Uzbekistan feed waste on a soybean meal-equivalent basis but is only forecast to account for 65 percent in 2021/22. Likewise, cottonseed oil as a percentage of total food use consumption is forecast to fall from 60 percent to one-third over the same timeframe.

This trend is likely to continue in the future as domestic demand for meal and oil grows. Over the past decade, the chicken flock has grown 10 percent annually spurred by rising domestic per capita consumption. Starting in June 2021, the Uzbekistan government will provide new subsidies for egg and poultry producers based on output, likely leading to immediate and long-term poultry production growth that will require more feed. Likewise, Uzbekistan oil consumption is assumed to rise in tandem with the relatively consistent 2 percent annual population growth.

Cottonseed production is likely to lag demand with relatively flat growth. A major contributing factor will be the effects of a March 2020 Presidential decree that liberalized the cotton market, cancelling state regulated production and prices. It is unclear what effect the change will have on production as an influx of foreign and domestic investments could increase cotton production while some farmers are likely to use their expanded autonomy to shift into alternative agricultural products like fruits and vegetables. Local crushers have been preparing for an uptick in sunflowerseed imports as continued investments to processing facilities are expected to increase sunflowerseed crush capacity to more than 1 million tons by 2022. With forecasts of record global sunflowerseed production and Uzbekistan cottonseed production at its lowest level in the USDA database, 2021/22 is forecast to be another strong year for Uzbekistan sunflowerseed and sunflowerseed oil imports.

Effective with this publication, USDA's Production Supply and Distribution database has been expanded to include sunflowerseed and sunflowerseed meal for Uzbekistan back to marketing year 2005/06 (sunflowerseed oil data already exists back to 1999/00). This addition accounts for much of the change in sunflowerseed trade balances this month.

PROJECTION FOR 2021/22

Most global oilseed attributes are forecast down this month primarily due to a 4-million-ton drop in Canada rapeseed production and a 2-million-ton dip in U.S. soybean production. Global 2021/22 oilseed production is forecast at 630 million tons, down 6 million from July. Oilseed imports are down 4 million tons driven by lower EU and China rapeseed imports and lower China soybean imports. Exports are down 4 million on lower Canada rapeseed and U.S. soybean exports. Global crush is down 4 million tons to 530 million on reduced rapeseed and soybean crush partially offset by increased sunflowerseed crush.

Global production of protein meals is down 3 million tons. Consumption of meals is down 2 million tons as lower consumption of rapeseed and soybean meal is partially offset by gains in sunflowerseed meal.

Global production of oils is down 1 million tons on lower rapeseed crush and consumption is down slightly. The projected U.S. season-average farm price for soybeans is unchanged at \$13.70 per bushel.

PROJECTION FOR 2020/21

Global 2020/21 oilseed production is forecast at 600 million tons, down marginally from July. Soybean production is also down slightly on lower Argentina soybean production. Oilseed imports are down 1 million tons from July on lower China soybean imports. Oilseed crush is down 3 million tons on lower China, U.S., and Canada soybean crush. Global oilseed stocks are up 2 million tons on larger China and U.S. soybean stocks partially offset by lower South American soybean stocks.

Global protein meal production is down 2 million tons on lower soybean crush. Global protein meal exports are up 2 million tons mostly on higher Brazil soybean exports. Global protein meal domestic consumption is down 2 million tons on lower China and Brazil soybean consumption.

Global vegetable oil production is down slightly on lower China soybean crush and Malaysia palm oil production. Vegetable oil exports are down marginally mostly due to lower Malaysia palm oil exports. Vegetable oil consumption is down slightly while ending stocks are up fractionally. The projected U.S. season-average farm price for soybeans is down 15 cents to \$10.90 per bushel.

EXPORT PRICES

July 2021 Soybean Export Prices

	U.S.	Argentina	Brazil
July Avg Price	\$555/ton	\$532/ton	\$551/ton
Change vs June	- \$12/ton	+ \$6/ton	+ \$9/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Despite overall decreasing trade volumes, primarily due to lower soybean demand from China, July export prices for U.S., Argentina, and Brazil soybeans held steady. .

July 2021 Soybean Meal Export Prices

	U.S.	Argentina	Brazil
July Avg Price	\$426/ton	\$396/ton	\$426/ton
Change vs June	+ \$3/ton	- \$11/ton	+ \$5/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Prices for U.S. and Brazil soybean meal in July were little changed overall, as China demand growth has slowed and Northern Hemisphere harvests have begun, leading to more plentiful meal supplies. Global demand for Brazil soybean meal continues to rise, keeping prices high. Argentina meal prices are down slightly on substantial soybean meal stocks, despite challenging Parana River export logistics.

July 2021 Soybean and Palm Oil Export Prices

	U.S. Soybean Oil	Argentina Soybean Oil	Brazil Soybean Oil	Indonesia Palm Oil	Malaysia Palm Oil
July Avg Price	\$1,554/ton	\$1,244/ton	\$1,273/ton	\$1,102/ton	\$1,079/ton
Change vs June	-\$54/ton	+\$53/ton	+\$39/ton	+\$61/ton	+\$68/ton

Source: International Grains Council; all prices are FOB: U.S. Gulf, Argentina Up River, Brazil Paranagua

U.S. soybean oil prices fell in July, while Argentina and Brazil prices rose. U.S. soybean oil prices have eased on reduced demand. Brazil prices are up on expanding domestic demand from its biodiesel industry urging oil imports; Argentina prices are up on stronger demand and reduced competition. Palm oil export prices rose on tight supplies.

2021/22 OUTLOOK CHANGES (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
Algeria	Meal, Soybean	Imports	600	450	-150	Higher soybean crush
Australia	Oilseed, Rapeseed	Exports	3,200	3,450	250	Strong demand in a short market
Brazil	Meal, Soybean	Exports	16,650	17,000	350	Continued marketing opportunities
	Meal, Rapeseed	Exports	5,000	4,700	-300	Lower crush, reduced supply
Canada	Oilseed, Rapeseed	Exports	10,100	6,900	-3,200	Reduced supplies on lower yields
	Oilseed, Soybean	Exports	3,900	4,100	200	Continued strong demand prospects
	Meal, Rapeseed	Imports	1,800	1,585	-215	Less demand due to lower Canada rapeseed exportable supplies
	Oilseed, Rapeseed	Imports	2,800	2,100	-700	Higher demand due to lower alternative supplies
China	Meal, Soybean	Exports	1,250	1,100	-150	Reflects 2020/21 change
	Oilseed, Soybean	Imports	102,000	101,000	-1,000	Lower rapeseed supplies
	Meal, Sunflowerseed	Imports	1,800	2,025	225	Lower rapeseed crush
European Union	Meal, Rapeseed	Exports	850	700	-150	Lower Canada rapeseed production and exports
	Oilseed, Rapeseed	Exports	300	150	-150	Lower Canada rapeseed production and exports
	Oilseed, Rapeseed	Imports	6,450	5,200	-1,250	Lower Canada rapeseed exportable supplies
Japan	Oilseed, Rapeseed	Imports	2,300	2,100	-200	Lower Canada rapeseed availability and exports
Mexico	Oilseed, Rapeseed	Imports	1,375	1,200	-175	Lower Canada rapeseed exportable supplies
Pakistan	Oilseed, Rapeseed	Imports	780	500	-280	Lower sunflowerseed production and crush
Russia	Meal, Sunflowerseed	Exports	2,000	1,850	-150	Higher rapeseed production and crush
	Oilseed, Rapeseed	Exports	565	715	150	Lower production
	Oilseed, Rapeseed	Exports	2,700	2,550	-150	Higher sunflowerseed production and crush
Ukraine	Meal, Sunflowerseed	Exports	5,200	5,550	350	Higher sunflowerseed production and crush
	Oil, Sunflowerseed	Exports	6,350	6,550	200	Higher production
	Oilseed, Sunflowerseed	Exports	200	400	200	Lower Canada rapeseed production and exports
United Arab Emirates	Oilseed, Rapeseed	Imports	1,200	900	-300	Lower soybean production
United States	Oilseed, Soybean	Exports	56,472	55,928	-544	

2020/21 OUTLOOK CHANGES (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
Algeria	Meal, Soybean	Imports	700	500	-200	Higher crush and lower meal import pace
Argentina	Meal, Soybean	Exports	28,250	28,500	250	Trade pace
	Oilseed, Soybean	Imports	4,700	5,000	300	Trade pace
Bangladesh	Oilseed, Soybean	Imports	2,650	2,400	-250	Lower demand
Brazil	Meal, Soybean	Exports	16,000	17,200	1,200	Trade pace
	Oilseed, Soybean	Exports	83,000	82,500	-500	Trade pace
Canada	Meal, Rapeseed	Exports	5,150	5,300	150	Trade pace
